INTRODUCTION TO PROJECT

1. INTODUCTION OF SYSTEM

- Now a day's computers as well as internet are important. Through the internet we can access the information of the whole world at one place.
- People use the internet for doing their work from home. We see many websites of various companies and organizations which provide the information about the companies and their services through the internet.
- We have developed a website on Dance namely World Of Dance. This website is for the People willing to learn dance but cannot afford professionals to learn so we have developed this website for them where they can learn dance for free by viewing dances on our website and even there are few services provided by us like hiring Personal Choreographer or trainer, joining classes, choreography for wedding as well as Parties.

- It gives you a brief idea about the different types of dance, The Choreographers, The teaching style and many more.
- There is an feedback form so that the viewers can share their feelings about how they felt and can share their views. Also all contact details are mentioned.

2. SCOPE OF PROJECT

- This website is user-friendly.
- Viewers can easily access the website.
- Viewers can watch all the dance videos and can learn them.
- Feedback form is available to give comments about the website.
- Coding is very simple as we have used the ASP.NET.

3. OBJECTIVES OF SYSTEM

- To display the detailed information about the Functions, Programmes, Themes.
- To create user friendly website.
- To make website more flexible and secure to use.
- To take feedback from user.
- To display all videos of dances so users can learn them.
- To make services effective and efficient.

4. FUNCTIONALITY

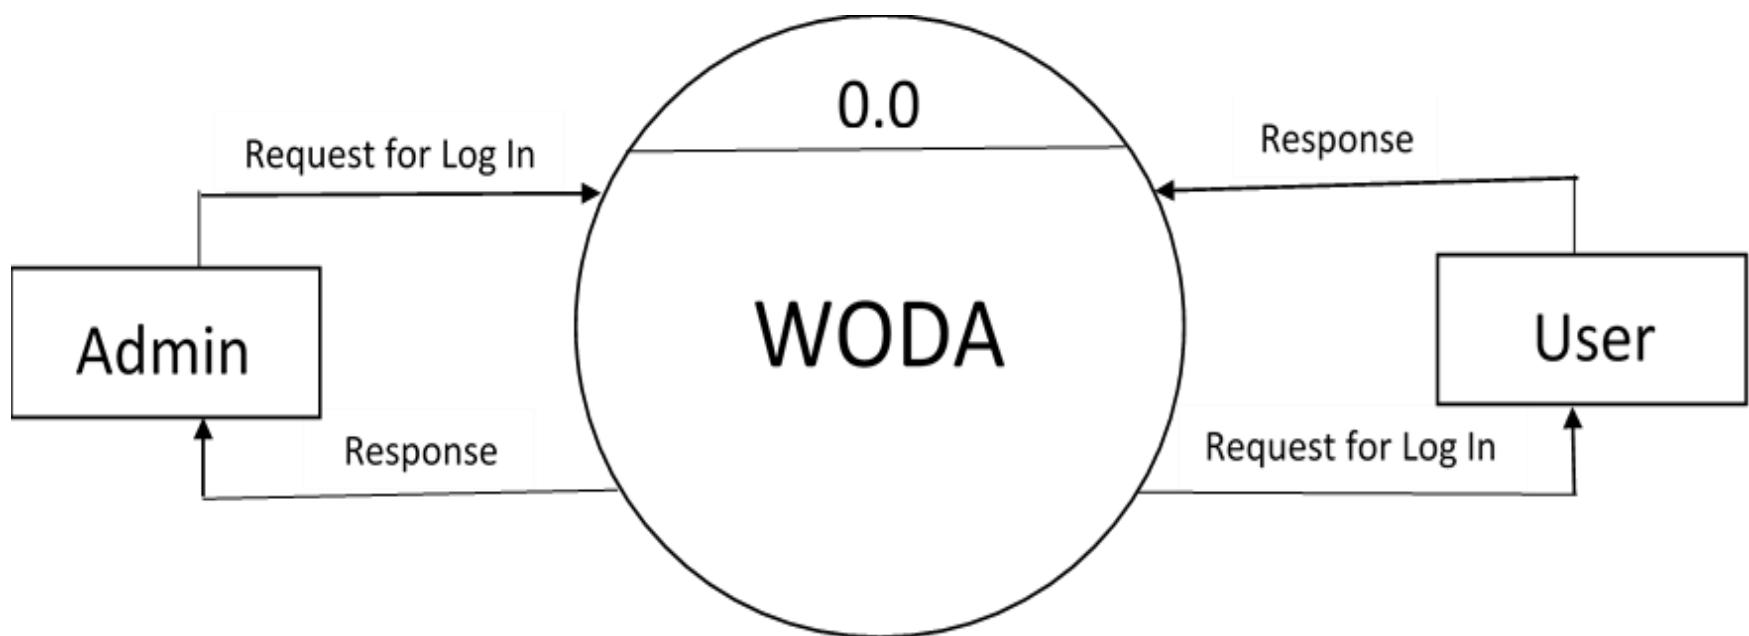

- Database
- Bootstrap
- HTML and CSS(Transparent and Animation)
- Sending Mails to clients.
- Parameterized Reports.
- Validations
- Uploading videos.
- Front-End and Back-End pages.
